

Baker School District 5J

Code: **JHCCB**
Adopted: 6/12/01
Orig. Code(s): JHCCB

Students - HIV, AIDS**

This policy applies to HIV students five years of age or younger, special risk HIV students as well as all students with AIDS. Students are considered to be “special risk students” whenever there is reasonable grounds to believe they present special risks to other students or other adults in an educational setting, e.g., an ongoing history of biting others.

The district shall adhere strictly in policies and procedures to the Oregon Revised Statutes and Oregon Administrative Rules as they relate to a student infected with HIV or AIDS¹.

A student with HIV or AIDS must notify the school superintendent for continued educational services. If the parent or student does not notify the school district, the Oregon Health Division or local health department will issue an order to exclude the student from school, or the parent (student) may voluntarily withdraw from school. In either case, the district must notify the student and parent of alternative education programs.

If the district is informed, written guidelines shall be requested of the parent (student). These guidelines shall include who may have the student information, who will give the information, how the information will be given and where and when the information will be given.

After the Oregon Health Division or local health department evaluates the student’s risks to others, including any restrictions which may be required, this condition will be reported by the parents to the district.

When informed and with written permission from the parent (student), the district will develop procedures for formulating an evaluation team. The team shall address the nature, duration and severity of risk as well as any modification of activities. Monitoring of the student’s condition shall be included. The district shall also develop policies and/or procedures for rumor control, infection control, student accommodations and public relations/media.

END OF POLICY
