

Students - HIV and HBV**

This policy applies to students six years or older who are HIV or HBV¹ and are not special risk.

“Special risk” students as used in this policy and as defined by Oregon Department of Human Services, Health Services, means students who lack control of their body secretions or who display behaviors such as biting, spitting or scratching and/or who have uncoverable, oozing lesions.

The public charter school will adhere strictly in policies and procedures to the Oregon Revised Statutes and the Oregon Administrative Rules as they relate to a student infected with HIV or HBV.

The public charter school recognizes a parent (student) has no obligation to inform the public charter school of an HIV or HBV condition and that the student has a right to attend school. If the public charter school is informed, written guidelines shall be requested of the parent (student). These guidelines shall include who may have the information, who will give the information, how the information will be given and where and when the information will be given.

When informed of the infection, and with written permission from the parent (student), the public charter school will develop procedures for formulating an evaluation team. The team shall address the nature, duration and severity of risk as well as any modification of activities. The team shall continue to monitor the student’s condition.

Notification to the resident district of the student shall be made if an HIV or HBV student withdraws from the public charter school.

The public charter school shall also develop procedures for rumor control, infection control, student accommodations and public relations/media.

END OF POLICY
