

**Students - HIV, AIDS\*\***

This policy applies to HIV students five years of age or younger, special risk HIV students as well as all students with AIDS.

“Special risk” students as used in this policy and as defined by Oregon Department of Human Services, Health Services, means students who lack control of their body secretions or who display behaviors such as biting, spitting or scratching and/or who have uncoverable, oozing lesions.

The public charter school shall adhere strictly in policies and procedures to the Oregon Revised Statutes and Oregon Administrative Rules as they relate to a student infected with HIV or AIDS<sup>1</sup>.

A student with HIV or AIDS must notify the public charter school administrator to receive continued educational services.

If the parent or student does not notify the public charter school, the Oregon Department of Human Services, Health Services, or local health department will issue an order to exclude the student from school, or the parent (student) may voluntarily withdraw from school. In either case, the public charter school must notify the resident district of the student.

If the public charter school is informed, written guidelines shall be requested of the parent (student). These guidelines shall include who may have the student information, who will give the information, how the information will be given and where and when the information will be given.

After the Oregon Department of Human Services, Health Services, or local health department evaluates the student’s risks to others, including any restrictions which may be required, this condition will be reported by the parents to the public charter school.

When informed and with written permission from the parent (student), the public charter school will develop procedures for formulating an evaluation team. The team shall address the nature, duration and severity of risk as well as any modification of activities. Monitoring of the student’s condition shall be included.

---

<sup>1</sup>HIV - Human Immunodeficiency Virus; AIDS - Acquired Immune Deficiency Syndrome

The public charter school shall also develop procedures for rumor control, infection control, student accommodations and public relations/media.

END OF POLICY
