## Talented and Gifted Program

In an effort to provide appropriate educational opportunities for able students, the district will provide and/or actively support an enrichment program for qualified students. The program will address critical thinking skills and enrichment activities that extend the regular curriculum. The primary aim of the enrichment program is to blend and integrate enrichment activities and resources into existing instructional programs. Students are allowed and encouraged to go beyond the routine acquisition of knowledge, challenging student ingenuity and understanding.

The program serves to broaden the investigation of standard curriculum and, with independent study, promote development of academic and in particular, these enrichment activities will be relevant, giving attention to specific student's talents, interests and abilities such as motivation, leadership and visual performing arts.

It is recognized that many enrichment activities are appropriate for all students, not only the academically able, and that enrichment activities may be considered appropriate at all levels of study.
