Orig. Code(s): IIBG-AR

## **Technology**

### **Purpose**

1. The primary purposes of technology are for learning, research and creative projects.
2. Other purposes include computer management systems such as library media circulation systems, on-line library and Internet resources; integrated learning systems; communication; student information system; finance accounting; and human resources management system.
3. Computer users will recognize and adhere to existing copyright laws.
4. All hardware purchased will be durable, appropriate for the intended applications and be consistent with the school's and/or district's technology plan.
5. All computer equipment purchases will be coordinated through and must be approved by the instructional technology center (ITC).
6. All software must be favorably reviewed and previewed by a staff member prior to purchase.
7. All software that is to be installed on the district's network will be coordinated through the ITC to ensure compatibility and proper licensing.
8. A district technology advisory committee, appointed by the superintendent, will annually review and update the district technology plan and make recommendations for technology acquisitions and use.
9. The district will provide technology training for all staff appropriate to the needs of their assignments.
