

Student Safety

Instruction in courses in industrial arts, science, homemaking, art, physical education, health and safety will include and emphasize accident prevention.

Building safety committees will ensure that safety regulations are reviewed with staff and students, as appropriate, to assure safety. The objectives of safety instruction will help students:

1. Learn how to work, play, and exercise safely and how to prevent accidents;
2. Learn proper procedures so as to reduce the possibility of accidents;
3. Develop habits of good housekeeping, proper storage and handling of materials;
4. Become familiar with personal protective devices and the proper clothing to be worn for safety purposes;
5. Develop skills in the safe use of tools and equipment;
6. Learn how to cooperate with others in the promotion and operation of a safety program in the school.

Safety instruction will precede the use of materials and equipment by students in applicable units of work in the courses listed above, and instructors will teach and enforce all safety rules set up for the particular courses. These will include but not be limited to the wearing of protective eye devices in appropriate activities. Students will be asked to sign off upon completion of reading safety policies and materials and upon the completion of safety instruction.
