

## **Local Wellness Program**

The Board recognizes that childhood obesity has become an epidemic in Oregon as well as throughout the nation. Research indicates that obesity and many diseases associated with obesity are largely preventable through diet and regular physical activity. Healthy eating patterns and increased physical activity are essential for students to achieve their academic potential, full physical and mental growth and lifelong health and well-being. To help ensure students possess the knowledge and skills necessary to make healthy choices for a lifetime, the superintendent shall prepare and implement a comprehensive district nutrition program consistent with state and federal requirements for districts sponsoring the National School Lunch Program (NSLP) and/or the School Breakfast Program (SBP). The program shall reflect the Board's commitment to providing adequate time for instruction to promote healthy eating through nutrition education, serving healthy and appealing foods at district schools, developing food-use guidelines for staff and establishing liaisons with nutrition service providers, as appropriate. The input of staff, students, parents, the public, representatives of the school food authority and public health professionals will be encouraged. The superintendent or designee will develop administrative regulations as necessary to implement the goals of this policy throughout the district.

### **Nutrition Education**

Nutrition education topics shall be integrated into the sequential, comprehensive health education curriculum taught in the Pre-K-8 and high school program and other subject areas as appropriate.

### **Nutrition Guidelines**

It is the intent of the Board that district schools take a proactive effort to encourage students to make nutritious food choices. During the school day, as specified in the Board policy EFA-AR - Local Wellness Program, food and beverages sold or served on district grounds shall meet administrative regulations requirements for nutritional standards.

One half hour after the last lunch hour, the superintendent shall ensure that nutritious foods are available as an affordable option whenever food that does not meet nutritional standards is sold or served on district property or at district-sponsored events. During this time it is expected that schools will limit the sale or serving of foods or snacks high in fat, sodium or added sugars; and minimize competition with nutritious foods served.

Although the Board believes that the district's nutrition and food services operation should be financially self-supporting, it recognizes, however, that the nutrition program is an essential educational and support activity. Therefore, budget neutrality or profit generation must not take precedence over the nutrition needs of its students. In compliance with federal law, the district's NSLP and SBP shall be nonprofit.

## **Physical Activity**

The Board realizes that a quality physical education program is an essential component for all students to learn about and participate in physical activity. Physical activity should be included in a school's daily education program from grades pre-K through 12. Physical activity should include regular instructional physical education as well as co-curricular activities, and recess. The district will develop and assess student performance standards in order to meet the Oregon Department of Education's physical education content standards. The district will make school facilities available to the community and student groups outside of school hours to promote and encourage physical activity, and good nutrition.

## **Reimbursable School Meals**

The district may enter into an agreement with the Oregon Department of Education (ODE) to operate reimbursable school meal programs. The superintendent or designee will develop administrative regulations as necessary to implement this policy and meet the requirements of state and federal law. These guidelines shall not be less restrictive than regulations and guidance issued by the Secretary of Agriculture pursuant to subsections (a) and (b) of section 10 of the Child Nutrition Act (42 U.S.C. 1779) and section 9(f)(1) and 17(a) of the Richard B. Russell National School Lunch Act (42 U.S.C. 1758(f)(1), 1766(a)(0)).

## **Evaluation of the Local Wellness Policy**

The Board will review the effectiveness of practices set forth in this policy annually with input from parents, students, representatives of the school food authority, school administrators and the public. In an effort to measure the implementation of this policy the Board designates the district principals as the individual who will be responsible for ensuring the district meets the goals outlined in this policy

The superintendent is directed to develop administrative regulations to implement this policy, including such provisions as may be necessary to address all food and beverages sold and/or served to students at school (i.e., competitive foods, snacks and beverages sold from vending machines, school stores, and fund-raising activities and refreshments that are made available at school parties, celebrations, sporting events, and meetings etc.), including provisions for staff development, family and community involvement and program evaluation.

END OF POLICY
