Evaluation of Instructional Programs

It is the policy of this school system to use systematic objectives in the programs of the district and of the schools. So far as possible, these programs should be developed on a total district (K-12) basis with careful attention to continuity that will most benefit the students.

The statewide assessment program and the testing program adopted by the district shall be used as a means of discerning areas of program strengths and weaknesses. Program development and efforts in instructional improvement shall be partially based on general and item analysis of these tests.

The deputy superintendent shall develop and present to the Board various reports that reflect the strengths and weaknesses discerned in the curricula and will recommend or direct recommendations of such changes and expanded efforts that will further improve said curricula.
