21st Century Schools Councils

The overall purpose of shared decision making is to help achieve our district mission through both improvement of the instructional program and delivery of support services.

Shared decision making is part of site-based decision making. It is a process, not an end in itself. Site-based decision making provides an opportunity for members of a school community to collaborate in solving problems, defining goals and shaping direction for an individual school.

The Board encourages the collaborative work of shared decision making. Thus, site councils and/or school leadership teams are supported.
