

### **Suspension/Make-up Work**

Students will be allowed to make up school work upon their return from the suspension if that work reflects achievement over a greater period of time than the length of the suspension.

Students will be allowed to make up and receive credit for daily assignments, laboratory experiments, class discussions or presentations, quizzes, unit examinations, mid-term and final examinations without an academic penalty.

Assignments provided for the student during the suspension period shall be due on the date that the student returns to school from the suspension.

Students will be granted the number of days equal to the suspension period to have completed and submitted all other make-up work to the appropriate teachers for grading.
