## **Educational Philosophy**

The primary aim of the Board is to assist component school districts in enabling each student in the education service district to grow in his/her own unique way toward the full development of his/her talents. Since each student is different and each grows and matures at his/her own rate, the intellectual, emotional and physical challenge which he/she must experience in the learning process must vary.

To accomplish this aim the Board shall strive to provide maximum excellence in education, keeping in mind the need for equal educational opportunity for all students.

It is not the intent of the Board to usurp local control, but rather, within financial limitations to enhance the work of the component school districts.
