

21st Century Schools Councils

The following administrative regulations shall serve as guidelines for the development of 21st Century Schools Councils.

Decision Making

The measures set forth in these rules and regulations should not be interpreted as diminishing the central role of the Board or the Board's legal authority (Oregon Revised Statute (ORS) 332.072). The mission, beliefs, priorities and policies of the Board continue to be central to the operation of the district.

21st Century Schools Councils shall be accountable and responsible to the district for the decisions they make.

Building administrators will work with their site councils to implement school goals and objectives in the areas of school improvement and program and staff development. The duties of 21st Century Schools Councils under state law shall include, but are not limited to:

1. The development of plans to improve the professional growth of the school's staff;
2. The improvement of the school's instructional program;
3. The development and coordination of plans for the implementation of programs at the school in accordance with Oregon's Educational Act for the 21st Century;
4. The administration of grants-in-aid for the professional development of teachers and classified employees; and
5. Advising the Board in the development of a plan for school safety and student discipline under ORS 339.333.

Duties shall not include making decisions that:

1. Supersede Board policy, state laws and rules, Oregon educational standards or federal laws and regulations; or
2. Conflict with the collective bargaining agreements with the Lincoln County Education Association (LCEA) and Oregon School Employees Association (OSEA).

Duties shall not deny the due process rights of any employee or student.

It is the responsibility of the building administrator to see that the site council operates within the parameters set by the district. The role of the building administrator is pivotal to the success of the implementation of 21st Century Schools Councils. Building administrators assume increased building responsibility for the organization and implementation of councils and to foster and support increased building responsibility. To achieve this, site councils will work through their building administrator to assist in determining goals and objectives for the school, and for program and staff development. All activities in these areas, however, must be in alignment with Board-adopted goals and objectives.

Schools, in collaboration with their site councils, will be expected to develop a clear set of education objectives and their performance in meeting those objectives shall be monitored by the district. The district will hold schools accountable for the goals they establish.

1. Not more than half of the members shall be teachers;
