

Integrated Pest Management

To ensure the health and safety concerns of student, staff and community members, the district shall adopt an integrated pest management plan (IPM)¹ which emphasizes the least possible risk to students, staff and community members and shall adopt a list of low-impact pesticides for use with the IPM plan.

The IPM plan is a proactive strategy that:

1. Focuses on the long-term prevention or suppression of pest problems through economically sound measures that:
 - a. Protect the health and safety of students and faculty;
 - b. Protect the integrity of district buildings and grounds;
 - c. Maintain a productive learning environment; and
 - d. Protect local ecosystem health.
2. Focuses on the prevention of pest problems by working to reduce or eliminate conditions that promote the establishment, feeding, breeding and proliferation of pest populations that create harborage for pests during building operations and maintenance. All measures covered by this IPM will cover all district construction projects and contractors hired to perform work at any district site or building.
3. Incorporates the use of sanitation, structural remediation or habitat manipulation or of mechanical, biological and chemical pest control measures that present a reduced risk or have a low-impact and, for the purpose of mitigating a declared pest emergency, the application of pesticides that are not low-impact pesticides;
4. Includes regular monitoring and inspections to detect pests, pest damage and unsanctioned pesticide usage;
5. Evaluates the need for pest control by identifying acceptable pest population density levels;
6. Monitors and evaluates the effectiveness of pest control measures;
7. Excludes the application of pesticides on a routine schedule for purely preventive purposes, other than applications of pesticides designed to attract or be consumed by pests;
8. Excludes the application of pesticides for purely aesthetic purposes;

¹See Model Integrated Pest Management Plan for Oregon Schools at http://www.ipmnet.org/tim/IPM_in_Schools/IPM_Materials.html (See *Model Plan for Large School Districts* or *Model Plan for Small School Districts*)

9. Includes school staff education about sanitation, monitoring, inspection and pest control measures;
10. Gives preference to the use of nonchemical pest control measures;
11. Allows the use of low-impact pesticides if nonchemical pest control measures are ineffective; and
12. Allows the application of a pesticide that is not a low-impact pesticide only to mitigate a declared pest emergency or if the application is by, or at the direction or order of, a public health official.

The district shall designate the facilities manager as the Integrated Pest Management Plan Coordinator with the authority for overall implementation and evaluation of the IPM plan.

Integrated Pest Management Plan Coordinator

The IPM Plan Coordinator shall:

1. Attend not less than six hours of IPM training each year. The training shall include at least a general review of integrated pest management principles and the requirements of IPM as required by Oregon statute;
2. Ensure appropriate prior notices are given and posted warnings have been placed when pesticide applications are scheduled;
3. Communicate the IPM plan essentials to the school community, custodians, maintenance, construction, grounds, faculty, and kitchen staff about the schools;
4. Oversee pest prevention efforts;
5. Ensuring identification and evaluation of pest situation;
6. Determine the means of appropriately managing pest damage that will cause the least possible hazard to people, property and the environment;
7. Ensure the proper use and application of pesticide applications when non-pesticide controls have been unsuccessful;
8. Evaluate pest management results; and
9. Keep for at least four years following the application date, records of applied pesticides that include:
 - a. A copy of the label;
 - b. A copy of the Safety Data Sheet (SDS);
 - c. The brand name and USEPA registration number of the product;
 - d. The approximate amount and concentration of pesticide applied;
 - e. The location of where the pesticide was applied;
 - f. The type of application and whether the application was effective;
 - g. The name(s) of the person(s) applying the pesticide;
 - h. The pesticide applicator's license numbers and pesticide trainee or certificate numbers of the person applying the pesticide;
 - i. The dates and times for the placement and removal of warning signs; and

- j. Copies of all required notices given, including the dates the IPM Coordinator gave the notices.
- 10. Respond to inquiries about the IPM plan and refer complainants to Board policy KL – Public Complaints;
- 11. Conduct outreach to district staff about the district’s IPM plan.
