

Mandatory Immunization for Admission

Principals shall be responsible for implementation of the immunization policy as per the following regulations:

1. Each principal shall conduct a primary evaluation of each child's records previously on file or newly submitted to determine whether the child is entitled to enroll or continue in attendance by reason of having submitted a statement that complies with the requirements.
2. If the records do not comply or are not received within 30 days, the principal shall notify the local health department and shall transmit any records concerning the child's immunization status to the department.
3. The department shall provide for a secondary evaluation of the records to determine whether the child should be excluded for noncompliance with the requirements. If the child is determined to be in noncompliance, the health department shall issue an exclusion order and shall send copies of the order to the parents and the principal. On the effective date of the order, the principal shall exclude the child from the school and shall not allow the child to attend until the requirements have been met.
4. The principal shall re-admit the child to school when, in the judgment of the local health department, the child is in compliance with the requirements. The health department shall return the records of the child.
5. The principal shall be responsible for updating the parent's or physician's statements as necessary to reflect the current status of the immunization of the child and the time at which the child comes into compliance with immunization requirements.
