

Psychological Testing of Students**

Psychological tests excluding intelligence tests will be administered to students only by certified school psychologists/psychometrists employed for this purpose or by interns under their supervision.

Psychological evaluations will be made only after informed and written consent is obtained from the child's parent or guardian, unless the student is of legal age to give his/her informed and written consent. Psychological data will be only one of several criteria used for determining any change in a student's educational program. Psychological data older than three years will not be used as the basis for prescriptive teaching or placement.

To ensure confidentiality of psychological records, written parental consent is required prior to the release of psychological data. The following information also will be required:

1. The signature of all persons, agencies or organizations desiring access to the records of students.
2. The right of parents to inspect all psychological records pertaining to their child.
3. The opportunity for a hearing to challenge the contents of their child's psychological records.
4. Giving students age 18 and older rights heretofore accorded to parents.

Parents will also be informed of their right to:

1. Inspect all psychological records pertaining to their student; and
2. A hearing to challenge the contents of their student's psychological records. Students 18 years of age and older will be extended all education records rights heretofore accorded to parents.
