Energy-Conserving Construction

The Board recognizes the importance and need for energy conservation in all facilities. MESD shall place a high priority on energy conservation measures within existing buildings.

Proposed construction and renovation projects that contain the most efficient energy-saving plans within an acceptable budget shall have high priority. Energy-saving designs shall be documented in the architectural evaluation and shall comply with educational specifications and cost control checklists as determined by the Board.

A continuous study of energy problems and energy sources shall be maintained for future planning.
