

## **Service Learning**

The Board supports the concept of service learning as a teaching methodology in the schools. As used in this policy, “service learning” means a teaching/learning strategy requiring students to develop and apply knowledge and skills through challenging projects that meet real community needs. Service learning includes activities that are coordinated with the community and institutions of higher education, as appropriate; are helpful in fostering civic responsibility; assist students in meeting career-related standards; are integrated into and enhance the academic curriculum of the students enrolled; and include structured time for students to reflect on the service learning experience.

It is the expectation of the Board that service learning be embedded in the culture of the district through activities that are tied to academic content standards and/or local performance standards and reflected in the Consolidated District Improvement Plan (CDIP) and school improvement plans (SIP). Age-appropriate activities that promote the development of students skills in the areas of critical thinking, communication, teamwork, civic responsibility, mathematical reasoning, problem solving, public speaking, professional technical skills, the scientific method, research skills and analysis are to be incorporated in the curriculum framework.

The superintendent may develop and implement service learning with the input of staff, students, parents, community and higher education input, as appropriate.

The superintendent is directed to identify existing Board policies, administrative regulations and other district practices that may be barriers to effective implementation of service learning. Identified policies will be referred to the Board for review and revision, as appropriate. The superintendent may also submit service learning funding needs to the Board as part of the budget planning process.
