

Myrtle Point School District 41

Code: **FEBCA**
Adopted: 5/10/04
Orig. Code(s): FEBCA

Energy-Conserving Construction

Because of increasing costs and decreasing supplies of conventional energy sources, the Board recognizes the importance and need for energy conservation in the construction of new school facilities.

Proposed construction and renovation projects which contain the most efficient energy-saving plans within an acceptable budget will have high priority. Energy-saving designs will be documented in the architectural evaluation and will comply with the educational specifications and cost control checklists as determined by the Board.

A continuous study of energy problems and energy sources will be maintained for future planning as developed in the facility plans for the district.
