

**Neah-Kah-Nie
School District 56**

Code: **JHCCA-AR**
Adopted: 11/12/01
Readopted: 4/14/08; 8/10/15
Orig. Code(s): JHCCA/JHCCB-AR

Students HIV, HBV and AIDS

Upon receiving a report of an HIV student five years of age or younger, special risk HIV student or any student with AIDS, the Oregon Health Division or local health department will, if the parent or student does not notify the district, issue an order to exclude the student from school, for a maximum of 30 days or the parent (student) may voluntarily withdraw from school. In either case, the district must notify the student and parent of alternative educational programs. A student six years of age or older with HIV or HBV and not special risk has no obligation to inform the district of his/her condition and has the right to continue to attend school.

When informed of an infection and with the written permission of the parent or student age 18 or older, the superintendent or his/her designee will immediately initiate the formation of a team to plan and manage communications with all parties regarding the case and a team to plan for the education of the student. The team will develop and recommend an educational plan to the superintendent for approval. The team will include:

1. Counselor;
2. Principal;
3. Student's teacher(s);
4. Local health department;
5. Student's parent or guardian;
6. Other members of the planning team may include a representative of the Oregon Health Division, the student's physician and representatives of such other agencies as appropriate.

The plan about the type of educational setting for the student should be based on the student's behavior, neurological development, physical condition and the expected type of interaction with other students and staff in the school.

Parents of the infected student, the student's teacher and/or the principal may request a reconvening of the planning team to consider new information about the student's condition.
