

## Student Health Services and Requirements

The district shall establish a health services program that is consistent with good health practices and provides:

1. Pertinent health information on the students; as required by Oregon statutes or regulations.
2. Health appraisal to include screening for scoliosis and vision/hearing problems. (Parents shall have the opportunity to request their students be exempt from participation in scoliosis, vision or hearing testing.) The district shall abide by these requests.
3. Health counseling for students and parents when appropriate.
4. Emergency care and first-aid assistance for sick and injured students and staff.
5. Control and prevention of communicable diseases as required by the State Health Division and the county health department.
6. Assistance for students in taking prescription and/or nonprescription medication according to established district procedures;
7. Services for students who are medically fragile or have special health-care needs;
8. Integration of school health services with school health education programs.

The Board directs its district health staff to coordinate with health personnel from other public agencies in matters pertaining to health instruction or the general health of students and employees.

In accordance with the requirements of the No Child Left Behind Act of 2001, the district recognizes its responsibility to notify parents in advance of any nonemergency, invasive physical examination<sup>1</sup> or screening that is required as condition of attendance; administered and scheduled by the school in advance; and not necessary to protect the immediate health and safety of the student, or of other students.

Notification shall be provided at least annually at the beginning of the school year or when enrolling students for the first time in school and shall include the specific or approximate dates during the school year when such activities are scheduled or expected to be scheduled.

Procedures shall be developed and implemented to carry out this policy.

---

<sup>1</sup>The term "invasive physical examination," as defined by law, means any medical examination that involves the exposure of private body parts, or any act during such examination that includes incision, insertion, or injection into the body, but does not include a hearing, vision or scoliosis screening. The term does not include any physical examination or screening that is permitted or required by state law, including physical examinations or screenings that are permitted without parental notification.

## END OF POLICY
