

HIV+ and AIDS - Students**

(Applies to special education students who are HIV+ as well as all students with AIDS.)

The district shall adhere strictly in policies and procedures to the Oregon Revised Statutes and Oregon Administrative Rules as they relate to a student infected with HIV or AIDS.

A student with HIV or AIDS must notify the school superintendent for continued educational services.

If the parent or student does not notify the school district, the Oregon Health Division or local health department will issue an order to exclude the student from school, or the student/parent may voluntarily withdraw from school. In either case, the district must notify the student and parent of alternative education programs.

If the district is informed, written guidelines shall be requested of the student/ parent. These guidelines shall include who may have the student information, who will give the information, how the information will be given and where and when the information will be given.

After the Oregon Health Division or local health department evaluates the student's risks to others, including any restrictions which may be required, this condition will be reported by the parents to the district.

When informed and with written permission from the student/parent, the district will develop procedures for formulating an evaluation team. The team shall address the nature, duration and severity of risk as well as any modification of activities. Monitoring of the student's condition shall be included.

The district shall also develop policies and/or procedures for rumor control, infection control, student accommodations and public relations/media.

END OF POLICY
