

Student Discipline Procedures

Each building principal, in cooperation with building staff, shall develop a building discipline procedure which provides the following:

1. What is expected of students in terms of discipline, i.e. rules;
2. The consequences of infractions of discipline rules;
3. A clearly defined procedure showing what disciplinary action will be taken for major discipline infractions. This procedure must state what will happen at the first violation and for each violation thereafter;
4. A logical sequence of responsibilities for discipline, beginning with the classroom teacher, etc., through the building administration, superintendent and Board.

The Board recognizes that, from time to time, students will be referred to the Board for disciplinary action for serious violation of discipline codes.

Building principals shall refer students to the superintendent for disciplinary hearings where previous disciplinary measures which building staff have taken with students have failed.
