

Wireless Communications Devices

The Board recognizes that the use of wireless communications devices (including but not limited to devices that utilize the cellular phone network and 2-way radios) may be appropriate to provide for the effective and efficient operation of the district and to help ensure safety and security of district property, staff and others while on district property or engaged in district-sponsored activities. To this end, the Board authorizes the purchase and employee use of wireless communications devices, as deemed appropriate by the superintendent or designee.

District-owned wireless communication devices shall be used for authorized district business purposes, consistent with the district's mission and goals. Personal use of such equipment is prohibited except in emergency situations.

Use of wireless communication devices in violation of Board policies, administrative regulations and/or state and federal laws will result in discipline up to and including dismissal and/or referral to Government Standards and Practices Commission and law enforcement officials, as appropriate.

The superintendent or designee is directed to develop administrative regulations for the implementation of this policy, including a uniform and controlled system for identifying employee wireless communication device needs and for monitoring use. Provisions will also be included for staff use of privately-owned wireless communication devices for authorized district business including appropriate reimbursement and stipends.

END OF POLICY
