

School Bus Scheduling and Routing

School bus routes will be planned and organized to ensure student safety and receive the maximum bus use efficiency.

1. Student safety shall be the major part of any route decisions.
2. Bus routing will be the responsibility of the superintendent, or delegated representative.
3. Anyone requesting a route change will be referred to the superintendent or representative responsible.
4. Route conditions will be reviewed routinely for possible upgrading of service.
5. Routes will be planned to ensure the least possible amount of time elapsing from first pick-up to school, commensurate with economical efficiency.
6. Bus routes will traverse only those roads which are city, county, state or federal roads at the district's discretion.
7. Students living within one mile of school may be transported if deemed necessary for health, safety or disability reasons when an approved supplemental plan is on file.
8. Secondary students eligible for bus transportation may be expected to walk up to one mile to a bus stop once the student is on city, county, state or federal roads. Elementary students may be expected to walk up to one-half mile to a bus stop.
9. A fully supported seat shall be provided for each student. Students must not stand.
10. Students may be transferred directly from one bus to another while being transported to and from school as long as no safety hazard is involved.
11. Where feasible, bus stops will be designated and students will be expected to gather at the assigned stop.
12. Transportation of students for nonschool group activities during regular school to home routes shall, in order to ensure adequate space, obtain prior approval from the superintendent or designee.
13. Staff members and patrons may, with written superintendent approval, use transportation routes if load conditions permit. A liability release must be signed prior to authorization.
