**Evaluation of Instructional Programs**

The Board will rely on the professional staff to provide continuous evaluation of the educational program and instructional processes. The Board may participate with the professional staff in such evaluation. It may also arrange for evaluations to be conducted by outside agencies.

The results of the educational programs in the classroom will be under regular and continuous study based on administrative classroom evaluations, standardized test results and feedback from students and parents.

The purposes of evaluation of instruction will be to:

1. Determine educational needs and provide information for planning;
2. Indicate instructional strengths and weaknesses;
3. Check on the suitability of programs within the community;
4. Show the relationship between achievement and the system's stated goals;
5. Provide data for public information.

Appropriate research studies will be periodically reviewed to determine recent trends and developments in evaluation techniques.

The superintendent, working with the professional staff, shall develop individual and group in-service programs to improve the educational services available in the district.

The superintendent, in cooperation and consultation with the staff, will keep the Board informed of the status of the instructional programs.
