Curriculum Development

The Board believes it is necessary that the district continually develop and modify its curriculum to meet the changing needs and diversity of our citizenry, to reflect changes in technology and fields of knowledge, and to assure the full, rounded and continuing development of our students. While keeping with the requirements of state law, the Board authorizes the superintendent, in consultation with staff, parents and the community, to review the curriculum periodically and to advise the Board on curriculum changes.

Curriculum development will be facilitated through the use of numerous curriculum advisory committees. It will be the responsibility of the superintendent to make recommendations regarding major additions, deletions, and modifications of the district's instructional program.
