

## **Food Services Management**

The District may provide food services for students and staff. Provision of free meals is not a requirement of the law. When the District provides food services, they shall comply with State and Federal laws and regulations relating to food service management.

The Board expects that the food services program will be self-supporting. The Superintendent shall prepare the food services budget based on that guideline. Subsidies from the general fund must be approved by the Board.

The Business Manager, under the authority of the Superintendent, shall be responsible for the management of the food service program.

The Superintendent shall report to the Board at least annually on the condition of the food service program and shall make such other reports as the Board requests.

END OF POLICY
