

## Equipment Assignment

1. School buses will be assigned using the following criteria:
  - a. Vehicle type;
  - b. Location of vehicle duties;
  - c. Vehicle capacity;
  - d. Type of vehicle duties;
  - e. Nonroute driving status of driver.
2. School bus drivers are expected to be able to correctly operate all types of vehicles existing in the fleet.
3. Reasonable checkout training will be available in the event a driver's license does not provide for the equipment in question. Further, reasonable familiarization time will be provided, if in the driver's opinion, it is needed.
4. Generally, the school bus fleet will be divided into three use categories:
  - a. Route buses;
  - b. Travel/spare;
  - c. Spare.

Except for cases of special need, a bus that has been placed in a category will not be used in other categories.

Specifically, because of tire equipage, route and spare buses will not be used in high average speed/long distance applications.
