

Local Wellness Program

The Board recognizes that childhood obesity has become an epidemic in Oregon as well as throughout the nation. Research indicates that obesity and many diseases associated with diabetes are largely preventable through diet and regular physical activity. Additional research indicated that healthy eating patterns and increased physical activity are essential for students to achieve their academic potential, full physical and mental growth and lifelong health and well-being.

To help ensure students possess the knowledge and skills necessary to make healthy choices for a lifetime, the superintendent shall prepare and implement a comprehensive district nutrition program consistent with state and federal requirements for districts sponsoring the National School Lunch Program (NSLP) and/or the School Breakfast Program (SBP). The program shall reflect the Board's commitment to providing adequate time for instruction that promotes healthy eating through nutrition education, serving healthy and appealing foods at district schools, developing food-use guidelines for staff and establishing liaisons with nutrition service providers, as appropriate.

The input of staff (including but not limited to, physical education and school health professionals), students, parents the public, representatives of the school food authority and public health professionals will be encouraged. The Board shall establish a Wellness Advisory Committee to advise the district in the creation of the local wellness policy. The superintendent or designee will develop administrative regulations as necessary to implement the goals of this policy throughout the district.

WELLNESS POLICY MONITORING, ACCOUNTABILITY AND COMMUNITY ENGAGEMENT

Record Keeping

The district will retain the following records to document compliance with the requirements of the wellness policy with the district's Wellness Committee secretary.

1. The written wellness policy;
2. Documentation demonstrating that the policy has been made available to the public;
3. Documentation of efforts to review and update the local wellness policy, including an indication of who is involved in the update and the methods the district uses to make stakeholders aware of their ability to participate;
4. Documentation to demonstrate compliance with the annual public notification requirements;
5. The most recent assessment on the implementation of the local wellness policy;
6. Documentation demonstrating the most recent assessment on the implementation of the local wellness policy has been made available to the public.

Annual Notification of Policy

The district will make available to the public annually, an assessment of the implementation, including the extent to which the schools are in compliance with policy, how the policy compares to model policy and a description of the progress being made in attaining the goals of the policy. The district will make this information available through the district website. The district will also publicize the name and contact information of the district or school official(s) leading and coordinating the policy, as well as information on how the public can get involved with the local wellness policy.

Triennial Progress Assessments

At least once every three years, the district will evaluate compliance with the local wellness policy, to assess the implementation of the policy and produce a triennial progress report that will include:

1. The extent to which schools under the jurisdiction of the district are in compliance with the policy;
2. The extent to which the district's policy compares to model wellness policy; and
3. A description of the progress made in attaining the goals of the district's policy.

The district will actively notify households/families of the availability of the triennial progress report.

Revisions and Updating the Policy

The district will update or modify the local wellness policy based on the results of the triennial assessments and/or as district priorities change; community needs change; wellness goals are met; new health science, information and technology emerge; and new federal or state guidance or standards are issued. The local wellness policy will be assessed and updated as indicated at least every three years following the triennial assessment.

Community Involvement, Outreach and Communications

The district will actively communicate ways in which the community can participate in the development, implementation and periodic review and update of the local wellness policy through a variety of means appropriate for the district. The district will also ensure that communications are culturally and linguistically appropriate to the community, and accomplished through means similar to other ways that the district and individual schools are communicating important school information with parents.

Nutrition Promotion and Nutrition Education

Nutrition promotion and nutrition education positively influence lifelong eating behaviors by using evidence-based techniques and nutrition messages, by creating food environments that encourage healthy nutrition choices and by encouraging participation in school meal programs. Students and staff will receive consistent nutrition messages throughout the school environment. Nutrition promotion also includes marketing and advertising nutritious foods and beverages to students and is most effective when implemented consistently through a comprehensive and multi-channel approach by staff, teachers, parents, students and the community.

Nutrition Guidelines

It is the intent of the Board that district schools be proactive in encouraging students to make nutritious food choices. All food and beverage items sold to students in a K-12 public school as part of the regular or extended school day shall meet the minimum state and federal standards. Exceptions to this requirement include items that are part of the USDA National School Lunch Program or School Breakfast Program. Other exceptions are foods and beverages provided in the following instances:

1. When the school is the site of school-related events or events for which parents and other adults are a significant part of an audience; or
2. The sale of food or beverage items before, during or after a sporting event, interscholastic activity, a play, band or choir concert.

Although the Board believes that the district's nutrition and food services operation should be financially self-supporting, it recognized that the nutrition program is an essential educational and support activity. Therefore, budget neutrality or profit generation must not take precedence over the nutrition needs of its students. In compliance with federal law, the district's NSLP and SBP shall be nonprofit.

The superintendent is directed to develop administrative regulations to implement this policy that address all food and beverage items sold and/or served to students in district schools, including provisions for staff development, family and community snacks and beverages sold from vending machines and school stores and similar food and beverage items from fund-raising activities and refreshments that are made available at school parties, celebrations and meetings.

Competitive Foods and Beverages

(see EFA-AR pg.11)

Staff Qualifications and Professional Development

All school nutrition program directors, managers and staff will meet or exceed hiring and annual continuing education/training requirements in the USDA Professional Standards for Child Nutrition Professionals. (see more details EFA-AR pg. 12-13)

Fund Raising

(see EFA -AR pg. 12)

Water

Free, safe, unflavored, drinking water will be available to all students throughout the school day and throughout every school campus. The district will make drinking water available where school meals are served during mealtimes.

Celebrations and Rewards

(see EFA-AR pg.12)

Food and Beverage Marketing in Schools

Any foods and beverages marketed or promoted to students on the school campus during the school day will meet or exceed the nutrition standards set by the USDA and the Oregon Smart Snacks Standards.

"Food and beverage marketing" is defined as advertising and other promotion in schools. Food and beverage marketing often includes an oral, written or graphic statement made for the purpose of promoting the sale of a food or beverage product made by the producer, manufacturer, seller or any other entity with a commercial interest in the product.

Physical Activity

The Board realizes that a quality physical education program is an essential component for all students to learn about and participate in physical activity. Physical activity should be included in a school's daily education program for grades pre-K through 12. Physical activity should include regular instructional physical education as well as co-curricular activities and recess. The district will develop and assess student performance standards in order to meet the Oregon Department of Education's physical education content standards.

Reimbursable School Meals

The district may enter into an agreement with the Oregon Department of Education (ODE) to operate reimbursable school meal programs. The superintendent will develop administrative regulations as necessary to implement this policy and meet the requirements of state and federal law. These guidelines shall not be less restrictive than regulations and guidance issued by the Secretary of Agriculture pursuant to subsections (a) and (b) of section 10 of the Child Nutrition Act (42 U.S.C. 1779) and section 9(f)(1) and 17(a) of the Richard B. Russell National School Lunch Act (42 U.S.C. 1758(f)(1), 1766(a)(0)).

School Employee Wellness

The district encourages school staff to pursue a healthy lifestyle that contributes to their improved health status, improved morale and a greater personal commitment to the school's overall wellness program. Many actions and conditions that affect the health of school employees may also influence the health and learning of students. The physical and mental health of school employees is integral to promoting and protecting the health of students and helps foster their academic success. The district's employee wellness program will promote health and reduce risk behaviors of employees and identify and correct conditions in the workplace that can compromise the health of school employees, reduce their levels of productivity, impede student success and contribute to escalating health-related costs such as absenteeism.

The district will work with community partners to identify programs/services and resources to compliment and enrich employee wellness endeavors.

Other School-Based Activities

The district will promote district and community-based activities that foster healthy eating and create environments that promote physical activity. Families and the community will be encouraged to provide healthy food choices in all situations where food is served. Educational workshops, screenings and literature related to healthy food choices and physical activity may be offered to families.

Evaluation of the Local Wellness Policy

The Board will involve staff (including but not limited to, physical education and school health professionals), parents, students, representatives of the school food authority, public health professionals, school administrators and the public in the development, implementation and periodic review and yearly update of this policy. In an effort to measure the implementation of this policy the Board designates the superintendent or his designee as the person who will be responsible for ensuring each school meets the goals outlined in this policy. The district will make available to the public annually, an assessment of the implementation, including the extent to which the schools are in compliance with policy, how the policy compares to model policy and a description of the progress being made in attending the goals of this policy.
