Resuscitation

In a life-threatening situation, district staff will dial 9-1-1 for paramedic assistance and resuscitate any person requiring it in order to sustain life until relieved by paramedics or other appropriate medical personnel.

The district defines resuscitation as an attempt to restore breathing and/or a pulse.

If possible, the district will attempt to honor a student and parent's wishes by not using resuscitation techniques given all of the following conditions are met:

1. The district has on file a physician-signed "DNR" (Do Not Resuscitate) order;
2. The district has on file a signed request for the DNR order accompanied by a liability waiver which also informs the parents that the conditions of this policy must be met in order for a DNR order to be effective as to the district; and
3. The student must be wearing a DNR bracelet at the time that any resuscitation may otherwise be required.

Use of Automated External Defibrillator (AED)

The following conditions must be met prior to emergency use of an automated external defibrillator (AED) when such equipment has been made available.

1. The district must train interested employees in the use of the AED. Names of the designated employees will be maintained in the school office. The district must train a sufficient number of employees in the use of the AED so that at least one trained employee may be reasonably expected to be present during school hours.
2. Any person using or assisting with the use of the AED on another person must call 9-1-1 or such other emergency phone number serving the area immediately prior to using the AED and must follow all emergency procedure protocol as outlined in the training and adopted by the district.
3. The AED, its battery and its electrodes must be maintained, inspected and serviced at least every six (6) months as recommended by the manufacturer by an individual that has been properly trained in the maintenance and use of the AED and has been designated to do so by the district. The maintenance and testing information shall be kept in a dated log to be stored with the equipment along with the signatures of the individual responsible for its upkeep.

4. The AED must be stored in a location from which the AED can be quickly retrieved during school hours. The presence and location of each AED must be clearly identified.
5. Maintenance use and storage of the AED will be in compliance with any applicable state and federal laws.

END OF POLICY
