

Scappoose School District 1J

Code: **GBEBC/JHCCC/EBBAA**
Adopted: 12/11/95

Infection Control - HIV, AIDS, HBV

The district shall use standard precautions at all times for infection control. Each person is therefore treated as though an HIV, AIDS or HBV¹ infection exists.

The district shall develop an exposure control plan that includes infection control procedures for staff and students.

Staff and students shall receive an annual in-service that includes correct procedures for cleaning up body fluid spills and for personal cleanup, immunization and personal hygiene, as well as the location and a content review of first-aid and clean-up kits. Kits shall be available for each room in the building and in each district vehicle.

In addition to an annual in-service, staff and students on a regular basis will receive HIV, AIDS and HBV information.

The information shall emphasize infection – how infection is spread as well as how it is not spread.

The district will cooperate with the Oregon Department of Education and/or the Oregon Health Division in delivering HIV, AIDS and HBV education.
