

Use of Tobacco, Alcohol or Drugs

Scappoose school students in violation of the district's tobacco, drug and alcohol policy shall be subject to the following nondisciplinary and disciplining procedures:

1. Non-Disciplinary Procedures

- a. **Self-Referral:** Students who are concerned about their involvement with substances are encouraged to ask a staff member for assistance. This staff member will help the student contact a member of the core team. The core team will help educate the student on the impact of the substance use on their personal, physical and academic well-being. The core team consists of administrators, school counselors and staff members.

All self-referrals (including those from athletes and other participants in school-sponsored activities) will be treated confidentially between the student, teacher and core team. The responsibility of the core team will be to identify possible supportive services to the student with no disciplinary action involved.

Students who are affected by another person's substance use also are encouraged to seek education and/or support for themselves. As with self-referrals, all information will be treated confidentially with no disciplinary action.

- b. **Other Referrals:** Effective substance abuse prevention and early intervention requires consistent awareness and careful observation by individuals who work with or observe the student on a daily basis. Individuals (staff, parent, another student, community member) who are concerned about a student's behavior or possible substance involvement, should contact the core team.
