

Home Teaching Program – Procedures

Health Condition

A parent of a student with an extended health condition lasting two weeks or more may apply for home teaching by contacting the superintendent's office. The superintendent may request additional information from a student's parents or doctor and will make a decision within two school days of the receipt of this information. If a home teacher is appointed, he/she will contact the parent(s) to schedule home teaching sessions equivalent to five hours per week.

Disability

A student with a disabling condition for which a multidisciplinary team decides home teaching may be a more appropriate placement will be assigned a home teacher after all requirements of PL 101-476 have been met. The home teacher will contact parents to schedule sessions and will comply with the current IEP.
