

## **Bilingual Education**

### **Program Procedures**

When a possible bilingual education student registers, the principal will notify the appropriate district personnel. A home visit could be arranged by the appropriate district personnel to measure English fluency if needed. For specific materials and instructional strategies, the appropriate district personnel should be contacted to develop a unique plan for each bilingual education student. An individual tutor and materials will be provided, depending on the fluency and specific need of the student. The budgeted services for district bilingual education students are composed of materials, mileage and a tutoring component.

### **Program Goal**

The overall goal of the bilingual education program is functional fluency in a grade-appropriate English speaking classroom.
