

**Parent Notification and Participation in Talented and Gifted Program\*\***

The eligibility process for identifying students who qualify for Talented and Gifted services is initiated by teacher request, parent request or by scoring at or above the 97th percentile on a norm-referenced achievement test in total math, total reading or on a cognitive ability test. Eligibility is determined through a case study which includes assessment data and information provided by parents, teachers, and the student, if appropriate.

Parents are notified of eligibility by letter and are invited annually to assist in writing the personal education plan for their child. Annual plan development, in partnership with parents, constitutes notification. All TAG identification, notification and plan documentation is kept with student cumulative folders.
