

Student Safety

The Board directs the development and approval of a Health, Safety and Emergency Plan designed to assure every student a safe, healthy environment in which to learn. This plan will comply with federal, state and local laws and regulations and with Board policy.

Local building safety and health committees appointed by the superintendent will ensure that general safety regulations are reviewed with staff and students as appropriate to assure student safety.

Instruction in courses such as industrial arts, science, homemaking, art and physical education will include and emphasize accident prevention.

Safety instruction will assist students to:

1. Learn how to work, play and exercise safely and to prevent accidents;
2. Learn proper procedures so as to reduce the possibility of accidents;
3. Develop habits of good housekeeping, proper storage and proper handling of materials;
4. Become familiar with personal protective equipment and the proper clothing to be worn for safety purposes;
5. Develop skills in the safe use of tools and equipment;
6. Learn how to cooperate with others in the promotion and operation of a safety program in the school.

Safety instruction will precede the use of materials and equipment by students in applicable units of work in the courses listed above. Instructors will teach and enforce all safety rules set up for the particular course. These will include but not be limited to the wearing of personal protective equipment in appropriate activities.

A student will report any accident sustained by him/herself while on district property to a district staff member. ALL accidents will be promptly investigated. As a result of the investigation any corrective measures needed will be acted upon.
