

Student Transportation in Private Vehicles

Transportation of students will be by the district's transportation system or by a district employee's automobile, properly insured, except as provided below.

Parents, employees and other designated adults may be permitted to transport students other than their own children, in their own cars, on field trips or on other school activities under the following conditions:

1. The superintendent has given prior approval of the activity and the parent is driving.
2. A permission slip signed by each student's parent has been received and filed by the principal or his/her designee, granting permission for the student to participate in the field trip and to ride in a privately-owned automobile.
3. The parent or other adult driving the automobile is properly licensed to drive and has the automobile liability insurance required in the state of Oregon.
4. The vehicle contains an adequate number of seat restraints, including when applicable, a child safety system for a child who weighs less than 40 pounds, regardless of age, and the adult driver requires their use. The child safety system must elevate the person so that a safety belt or safety harness properly fits the individual and meets the minimum standards and specifications of law. A person over 40 pounds or who has reached the upper weight limit for the forward-facing car seat must use a booster seat until four feet nine inches or age eight and the adult belt properly fits¹. A person who is taller than four feet nine inches or eight years of age or older must be properly secured with a safety belt or harness that meets the requirements under ORS 815.055. Training in the proper installation and use of child safety system may be required. The driver is responsible for not placing children under the age of 13 in the front seat of a vehicle equipped with passenger-side air bags.
5. The parent's/staff member's driving record is acceptable to the insurance carrier and superintendent.

END OF POLICY

¹"Proper fit" means the lap belt of the safety belt or harness is positioned low across the thighs and the shoulder belt is positioned over the collarbone and away from the neck.
