

Providing Lease Space, Other Facilities and Services

The ESD may provide services to public and private entities other than component districts. Services and facilities may be provided to other school districts, government agencies and private entities under the following conditions:

1. A written agreement approved by the ESD Superintendent or designee and the receiving entity will delineate the conditions under which the services or facilities may be delivered;
2. The cost of the ESD providing such services and facilities shall be fully reimbursed by the receiving entity. Cost determination shall include actual cost of delivery and an appropriate amount for district fixed costs. Exceptions will be approved by the Superintendent or his/her designee;
3. Services and facilities provided to entities other than component districts shall be limited to those being provided to component districts except that a government agency, health care agency, social service organization or employment training agency may contract with the ESD to provide services in addition to those normally provided by the ESD;
4. The ESD must submit proposals for entrepreneurial services and facilities to component districts for approval to ensure that component districts receive information about the costs and benefits of providing these services. This information must include a description of funding sources the ESD will use to provide entrepreneurial services.
