A “serious health condition” means an illness, injury, impairment or physical or mental condition of an employee or family member that involves one of the following:

1. Hospital Care

Inpatient care (i.e., an overnight stay) in a hospital, hospice or residential medical care facility, including any period of incapacity or subsequent treatment in connection with or consequent to such inpatient care.

2. Absence Plus Treatment

a. A period of incapacity of more than three consecutive calendar days (including any subsequent treatment or period of incapacity relating to the same condition) that also involves:

- (1) Treatment³ two or more times by a health-care provider, by a nurse or physician’s assistant under direct supervision of a health-care provider or by a provider of health-care services (e.g., physical therapist) under orders of, or on referral by, a health-care provider; or
- (2) Treatment by a health-care provider on at least one occasion which results in a regimen of continuing treatment⁴ under the supervision of the health-care provider.

3. Pregnancy

Any period of incapacity due to pregnancy or for prenatal care.

³ Treatment includes examinations to determine if a serious health condition exists and evaluations of the condition. Treatment does not include routine physical examinations, eye examinations or dental examinations.

⁴ A regimen of continuing treatment includes, for example, a course of prescription medication (e.g., an antibiotic) or therapy requiring special equipment to resolve or alleviate the health condition. A regimen of treatment does not include the taking of over-the-counter medications such as aspirin, antihistamines or salves; or bed-rest, drinking fluids, exercise and other similar activities that can be initiated without a visit to a health-care provider. An exception to this definition of regimen could occur when an employee suffers from a minor illness generally treated with over-the-counter medication, bed rest and intake of fluids so long as the employee is incapacitated for more than three days and is under continuing treatment by a health-care provider for the specific ailment.

4. Chronic Conditions Requiring Treatments

A chronic condition which:

- a. Requires periodic visits for treatment by a health-care provider or by a nurse or physician's assistant under direct supervision of a health-care provider;
- b. Continues over an extended period of time (including recurring episodes of a single underlying condition); and
- c. May cause episodic rather than a continuing period of incapacity (e.g., asthma, diabetes, epilepsy, etc.).

5. Permanent/Long-term Conditions Requiring Supervision

A period of incapacity which is permanent or long-term due to a condition for which treatment may not be effective. The employee or family member must be under the continuing supervision of, but need not be receiving active treatment by, a health-care provider. Examples include Alzheimer's, a severe stroke or the terminal stages of a disease.

6. Multiple Treatments (Nonchronic Conditions)

Any period of absence to receive multiple treatments (including any period of recovery therefrom) by a health-care provider or by a provider of health-care services under orders of, or on referral by, a health-care provider, either for restorative surgery after an accident or other injury, or for a condition that would likely result in a period of incapacity of more than three consecutive calendar days in the absence of medical intervention or treatment, such as cancer (chemotherapy, radiation, etc.), severe arthritis (physical therapy), kidney disease (dialysis).
